

Vargus REACH Statement

Under REACH Regulation (EC) No 1907/2006, Vargus is classified as a producer of "articles." Pursuant to Article 33(1) of REACH, article suppliers are required to inform recipients if an article contains a Substance of Very High Concern (SVHC) at a concentration above 0.1% w/w (weight by weight).

The SVHC Candidate List is maintained and regularly updated by the European Chemicals Agency (ECHA). The list was most recently updated on February 4th, 2026, and currently includes 253 candidate substances. The full list is available at: <https://echa.europa.eu/web/guest/candidate-list-table>

Based on material content certifications provided by Vargus's suppliers, none of these substances are present in the materials used in our products, including packaging and shipping materials. Accordingly, Vardex, Groovex, and Shaviv products do not contain any SVHC at a concentration exceeding 0.1% w/w.

This statement is based on information obtained from Vargus's supply chain and is provided in good faith. Vargus makes no express or implied warranty regarding the completeness or accuracy of supplier-provided data.

Safety Data Sheets (SDS) are available upon request.

Vargus is committed to full compliance with REACH requirements and will notify customers of any changes in article content
